YOU ARE NOW IN TANZANIA, A BEAUTIFUL COUNTRY WHERE THE PEOPLE ARE SUPER-FRIENDLY AND THE WILDLIFE IS INCREDIBLE

It's also home to Africa's highest mountain — super cool! Mike, Alpha and Foxtrot are keen to explore with you, so let's go.

MATCHY-MATCHY

You know how Mike loves facts? Well, he's put together a little challenge for you. Can you match his questions with the right answers and draw a line to link them together? Let's play 'matchy-matchy'!

1. What's the name of the city where MAF has a base?

2. What food is a common treat across Africa, and is often served with curry?

3. What attacked an MAF aircraft, sabotaging a medical safari?

4. What does the Swahili word 'safari' mean?

5. How do you say goodbye in Swahili?

6. What is the name of a sweet, milky drink prepared over a charcoal fire?

7. What is the highest mountain in Tanzania called?

8. Where does the great wildebeest migration begin each year?

MAASAI CHAI

JOURNEY

SERENGETI NATIONAL PARK

HYENAS

ARUSHA

KWAHERI

MOUNT KILIMANJARO

CHAPATI

TOP TIP

Putting all the answers in alphabetical order may make the matching up a bit easier! Check below to see if you're right!

You've probably heard of wildlife safaris, but what about medical safaris?

MAF's special safari flights take doctors, nurses and supplies to remote communities that don't have medical facilities. Sometimes a patient needs to reach hospital as quickly as possible on a special flight called a medevac (medical evacuation).

Mike, Alpha and Foxtrot have been asked to help a pregnant woman who needs an urgent medevac. Can you lead them quickly and safely to the waiting aircraft?

Let's get crafty

It's crafty-fun time with Alpha. It might get a little messy, so be sure to ask a parent to help you set up.

You will need:

Potato (or apple), paper, 3 saucers, red, white and blue paints, paint brush or sponge, vegetable knife (plus adult supervision).

- » Pour some paint into each of the saucers
- » Paint your paper blue and leave it to dry
- » Cut the potato in half (ask an adult to help)
- >> Using one half, carve bits off the flat edge of the potato to make a plane shape
- Using the other half, carve bits off to make a cloud shape
- Have fun potato printing white clouds and red planes!

Please ask your parents to share your creations with us using #mafdiscovery or by emailing discovery@maf-uk.org

PAUSE AND PRAY

Prayer is so important — and God always hears. Talk to God about Tanzania and ask Him:

- » To bless all the people, including MAF staff
- » For safety during the two rainy seasons each year
- For lives to be saved through MAF's medical emergency flights
- >> For help during droughts and food shortages
- » For food to reach malnourished children.

During the country's two rainy seasons, the roads become dangerously muddy. Even motorbikes struggle to reach their destination and many villages are cut off.

At times like these, MAF planes are lifesavers. But imagine what it was like for people before MAF could fly in. If someone was ill or injured and the roads were too muddy for travel, patients would need to be carried to another village for help, which could take days.

Could you do that?

Let's role play a 'piggy-back-rescue'! First set the scene — choose a room and remove anything dangerous so you don't slip or trip over it. Then place soft squishy things on the floor to represent mud. (Cushions and bedding are ideal.) Find a sibling or a large teddy to be the patient, and give it a go. How long can you carry them for?
